Rotheiser et al teach an air cleaner (10) comprising a lower retaining segment (16), an upper retaining segment (18) and a filtration member (20), and the lower retaining segment further comprises an air cleaner coupling means for coupling the air cleaner to the air cleaner receptacle, and the lower retaining means segment and the air coupling means being integrally formed from a single material (see 80A in Figs. 1 & 3). Rotheiser et al further teach the coupling means further comprising threaded portion (see Figs. 1 & 3). Rotheiser et al also teach a method of coupling an air cleaner to an air receptacle comprising the steps of inserting a coupling means into a threaded receptacle means, rotating the air cleaner within an air cleaner receptacle until adequate secured.

Ham teaches an air cleaner having a lower retaining segment (14b), an upper retaining segment (14a), a filtration member (12), an air cleaner coupling means – projections not labeled (in Fig. 6a) integral with lower retaining segment (14b), and the filter cartridge is disposable (see col. 5, line 50).

Merritt et al (5,919,279), Keller et al (5,509,948), Dudley et al (5,275,636) and Boeckermann et al (5,112,372).

Merritt et al teach an air cleaner having a lower retaining segment (46), an upper retaining segment (44), a filtration member (18), an air cleaner coupling means (62) integral with lower retaining segment (46) (see details of Fig. 2).

Keller et al teach an air cleaner (16) having a lower retaining segment (15), an upper retaining segment (14), a filtration member (20), an air cleaner coupling means (28) integral with lower retaining segment (15), and the filter cartridge is disposable (first line of Abstract) (see details of Fig. 1).

Dudley et al teach an air cleaner having a lower retaining segment (22), an upper retaining segment (20), a filtration member (14), an air cleaner coupling integral with lower retaining segment (22), and the filter cartridge is disposable (see first line of the Abstract) (see details of Fig. 1):

Boeckermann et al teach an air cleaner having a lower retaining segment (20), an upper retaining segment (19), a filtration member (16), an air cleaner coupling (24) integral with lower retaining segment (20) (see details of Fig. 1).
